

Unity Attack VFX Pack (v1.0.0)

Online : https://docs.google.com/document/d/1_5EBEDFS3c3qKRZwsLtWM0bXo_QjXvEa-FWhVyXHpok/edit?usp=sharing

Package contains VFX that can be used for different types of attacks.

Package requires Textmesh Pro.

Package content

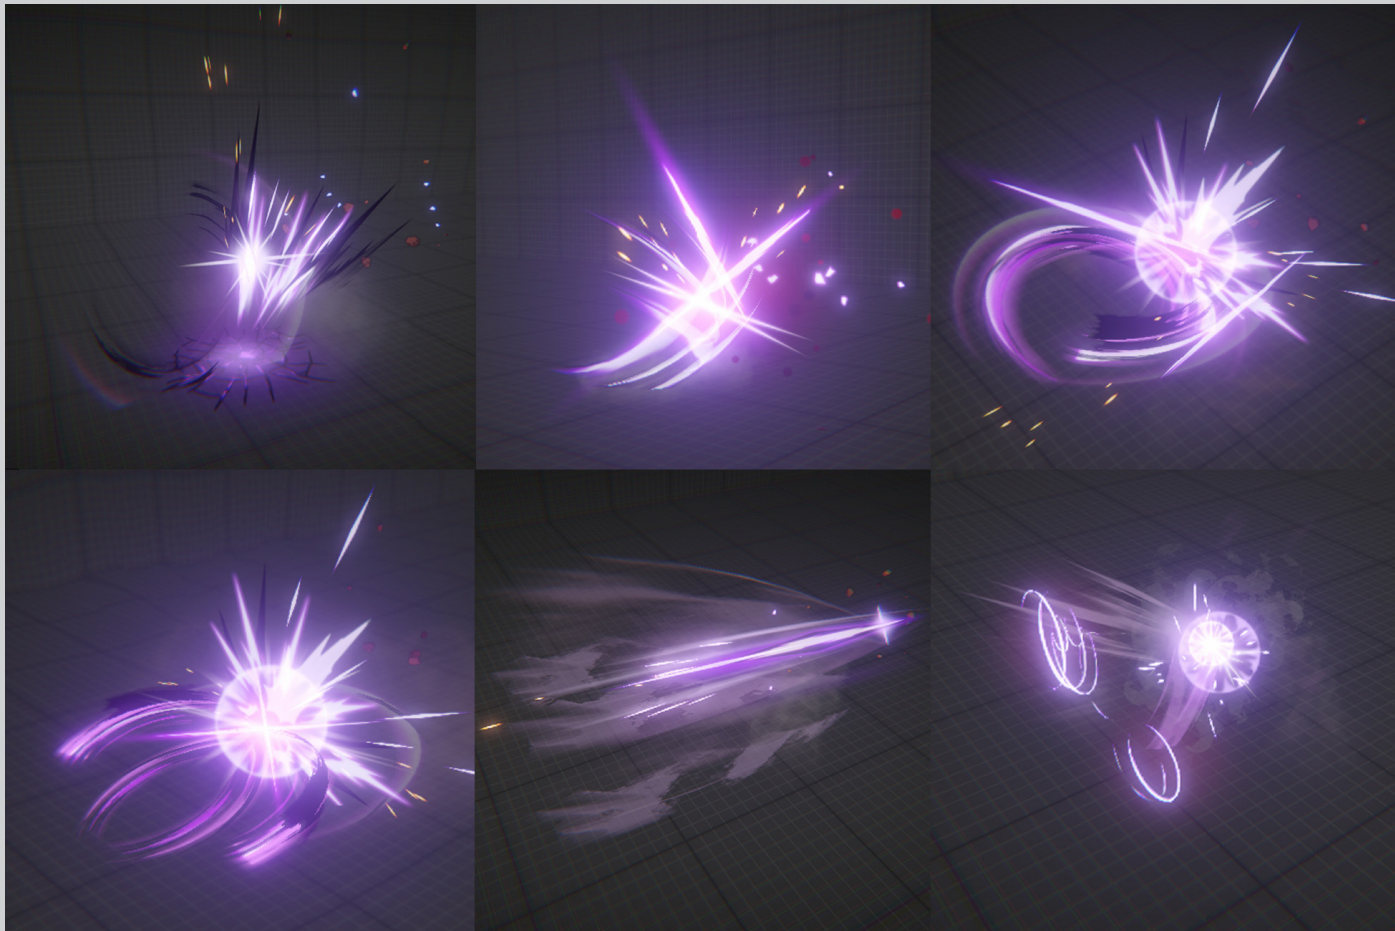

unitypackage asset file contains :

91 VFX prefabs for attack and impact

- 66 attack VFX (33 on ground + 33 on air)

- 25 impact VFX

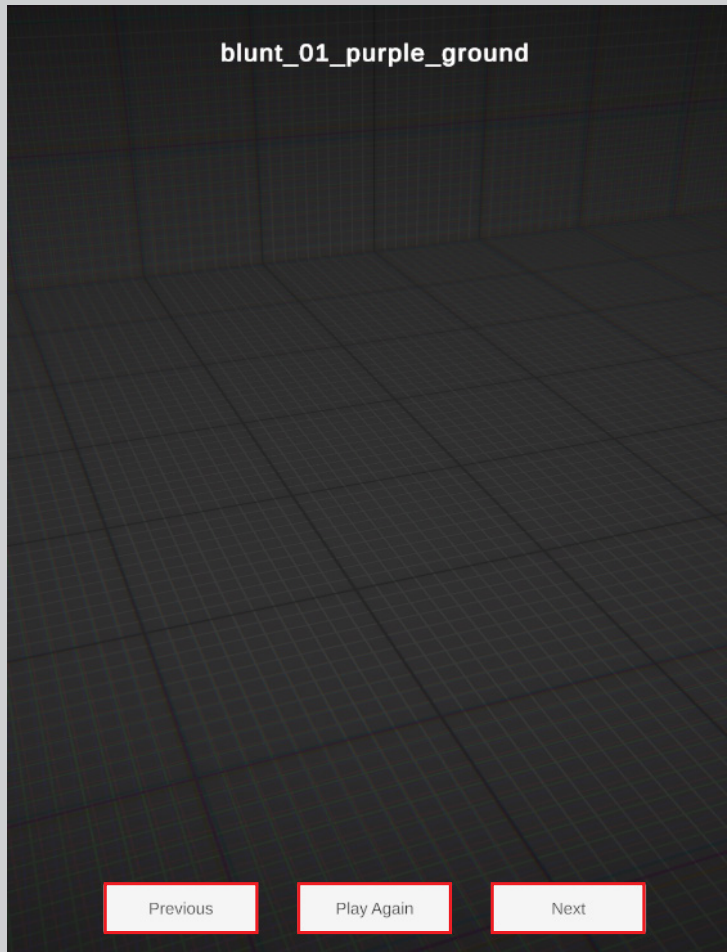

- 1 multi feature shader

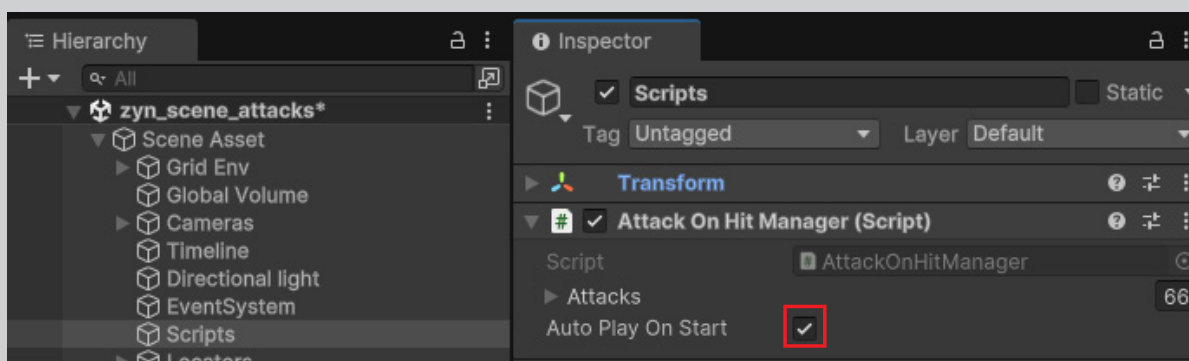

Demo Scene

To view VFX in scene :

- Search for “zyn_scene_attacks” in project. (Assets > Zynscope > scenes > zyn_scene_attacks)
- Enter Play mode.
- Cycle through prefabs by hitting “Previous” and “Next” in the Game window.
- Hit “Play Again” to view the current prefab.

- Enable auto play in Hierarchy > Scene Asset > Scripts > Attack On Hit Manager > Auto Play On Start.
- Checking this will cause the VFX cycle to run on it's own. (Note: This has to be done before entering Play mode.)

Assets made in Unity 6 (6000.0.24f1)
